- [Further Reading](#)

Below we have compiled publicly available sources from around the world that present views on Web Analytics Metrics.

Key Topics

- [Visits and Sessions in Web Analytics](#) — Resources about the visits/sessions metric in web analytics, which measures the number of times a website was visited. A visit comprises one or more pages viewed; one user could be measured more than once.
- [Visitors, Unique Visitors and Unique Users](#) — Resources about the visitors/unique visitors/unique users metric in web analytics, which measures the number of people who visited a website. Each visitor/user could have visited the website multiple times and viewed multiple pages.
- [New Visitors, Repeat Visitors and Returning Visitors](#) — Resources about the new/repeat/returning visitors metric in web analytics, which measures how many of a website's visitors are new to the site vs. returning to the site or visiting with a certain frequency.
- [Page Views and Unique Page Views](#) — Resources about the page views and unique page views metric in web analytics, which measures how many times a page or URL was viewed on a website, in general or by unique users.
- [Time on Site, Session Duration](#) — Resources about the times on site/session duration metric in web analytics, which measures the amount of time a visitor spent on a website.
- [Page Time Viewed, Page Visibility Time, Page View Duration](#) — Resources about the page time viewed/page visibility time/page view duration metric in web analytics, which measures the amount of time a visitor spent on a specific page or URL in a website.
- [Average Page Depth, Page Views Per Average Session](#) — Resources about the average page depth metric, also known as pages per average session, which measures the average number of web pages viewed by a visitor to the website, indicating the level of user engagement.
- [Bounce Rate](#) — Resources about the bounce rate metric, which measures how many of a website's visitors immediately left the site, an indication of visitor satisfaction with the website or its content.
- [Conversion Rate](#) — Resources about the conversion rate metric, which measures the percentage of website visitors who performed an action beneficial to the site owners (a conversion). This is an indication of whether the website is meeting its goals.
- [Ad Impressions](#) — Resources about the ad impressions metric, which measures how many times an ad placed on a website was viewed by potential site visitors (only some of whom actually click the ad and visit the advertising website).
- [Referrers and Social Media Traffic](#) — Resources about the referrers metric in web analytics, which measures the number of visitors coming to a website via referring sites - other sites that link to the website. A special case of referral traffic is social media traffic - traffic to a website from social media sites like Facebook and Twitter.
- [Direct Traffic in Web Analytics](#) — Resources about the direct traffic metric in web analytics, which measures the number of visitors entering a website directly by typing the URL or clicking on a bookmark, not via other websites.
- [Source and Medium in Web Analytics](#) — Resources about possible source of traffic to a website (referrals from other sites, search traffic, direct, links from emails, etc.) and the source/medium metric in web analytics, which measures how many

Be the first to get the latest news on analytics

of a website's visitors came from each source and provides details (such as a specific URL the visitors originated from).

Perspectives on Web Analytics Metrics

- **Analyze Backwards with Reverse Cohort**

In our online world, we usually analyze going forward in time. We define the starting event in the user journey, and examine the events or actions that followed. The same logic lies at the base of Cohort analysis, which is used to identify behavioral patterns or trends within a pre-defined period of time, starting from the first user event and analyzing the actions that follow.

Key Performance Indicators in Web Analytics

- **What's The Point Of a KPI in Web Analytics**

In web analytics, a key performance indicator is a web metric that is essential for your business's success. The emphasis here is on the word essential. If a 10% change—positive or negative—in a KPI doesn't make you sit up and call someone to find out what happened, then it is not well defined.

Which Metrics to Use for Web Analytics

- **Most Underrated Web Metrics**

The problem with data used to be that we didn't have enough of it. The problem with data today is that there is just way too much of it. If you don't know what you're looking for, you will likely fall into the familiar trap of spending too much time on things that don't matter.
